Forecast for Thursday 01 Feb 2024

Weather: Dry through the morning with some sunny spells. The sunshine turning increasingly hazy through the morning as high cloud thickens, but likely staying dry until dark. Some light rain and drizzle then developing through the evening.

Chance of cloud-free hill tops above 800m: 90% for much of the day, but falling from the evening onward. By midnight becoming 40% in the east and near zero across western hills.

Low Cloud and visibility: Cloud largely above the tops until the late afternoon with just the odd patch obscuring some tops above 900m. Cloud descending during the evening covering most hills above 600m by midnight, with some patches as low as 400m in the west. Good visibility for much of the day, but becoming poor on the tops during the evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Mostly fine conditions, but still feeling cold in the blustery breeze. Conditions quickly deteriorating during the evening, with poor visibility setting in, and winds becoming strong, especially on the tops and high level ridges.

Forecast for Friday 02 Feb 2024

Weather: Cloudy with outbreaks of rain and drizzle, most persistent and perhaps occasionally heavy over western hills. Best of any brighter spells likely in the east. Despite mild temperatures, strong gusty winds and limited sunny spells will lead to a colder feel on the summits.

Maximum wind: Southwesterly 25-35mph, gusting 45-55mph.

Chance of cloud-free hill tops above 800m: Near 0% in west, 30% in east

Low Cloud and visibility: Widespread cloud obscuring summits above 600m, with some patches down to 400m in the west. The odd clearer spell possible across eastern hills, with cloud lifting to 900m at times. Good visibility but falling to a few km in any rain and drizzle and very poor in amongst any cloud on the summits.

Temperature: **Valleys:** Plus 6 Celsius rising to Plus 12 Celsius.
At 800m: Plus 5 Celsius
Freezing level: Above the summits
